Blood Group, HIV, HBsAg & HCV reports

OVERVIEW

- Despite the noteworthy accomplishments of medical science today, there is no industrial facility that fabricates blood. It is just in people that human blood is made & circled. There are no real inconveniences of donating blood.
- The normal measure of blood present in a grown-up is 4-5 liters or around 8% of the body weight. At one time 350 - 450 ml will be drawn from a donor.
- Your single donation can help upwards of three individuals. Blood donation takes only about 45 minutes and it is safe procedure.
- You can donate blood for every 3 months.

TYPES OF BLOOD DONATION

- General Blood Donation - 450 ml or less than 1 pint, of whole blood is collected from each donor in a plastic bag that contains an anticoagulant preservative.
- The blood volume or plasma is replaced within a day. Four to eight weeks are needed for complete replacement of the red cells.
- Helps those wishing to loose weight.
- Biannually reduces the risk of cancer and mortality.

KNOW THE CRITERIA

- Blood donors should be in good health & not suffering from any serious illness. It is very important to ensure that the act of donating blood does not jeopardize the donors health in any way.
- Safe blood is blood that does not contain viruses, bacteria, parasites, drugs or other injurious factors that may harm a blood recipient. Donated blood must also not harm the recipient. It must be safe for transfusion to those who need it.
- Eligible donors - Anybody between 18 to 60 years of age and leading a healthy life, with weight above 50 kg, can donate up to 450 ml of blood. Your body can replenish this volume within 24 hours.

GO AHEAD AND DONATE!!

- Blood contains many life - saving components that can help to treat different illnesses & injuries.
- You also benefit by donating blood as it reduces the chances of heart diseases (beginning of heart problems)
- By keeping the blood line flowing, you will greatly contribute towards a healthier, happier society.
- For many people, blood donors are their life-line. Blood donation gives a proud feeling to touching someone's life in such a beautiful way.
- It's an experience that no words can define. You have to donate blood yourself to find out.

"Do remember, any one may require blood any time including ourselves and our dear ones"
